ESTABLISHED 1871

Mestemacher GmbH supplies German food retailers' bread departments and more than 80 countries worldwide with Westphalian pumpernickel, protein bread specialities, oat bread specialities without yeast and flour, organic and conventional wholemeal rye breads, as well as international bread specialities such as Italian organic wraps, Italian organic spelt wraps, organic wholemeal wheat toast, organic spelt toast, Indian naan bread specialities baked Tandoori style, gourmet focaccia specialities, pita bread varieties, and wrap varieties. Mestemacher operates its own mill where it freshly mills organic and conventional rye into wholemeal rye meal before baking. While conventional flours lose valuable ingredients, the rye meal remains rich in minerals such as potassium and phosphorus as well as B vitamins. Mestemacher has been promoting organic farming since 1985 and is actively involved in nature conservation. As the first producer of packaged wholemeal breads sourced from controlled organic cultivation, the plant bakery has been promoting the existence and growth of organic farmers since 1985.
