

New Construction of the Administration Headquarters of Mestemacher GmbH, am Anger 15, 33332 Gütersloh

Gütersloh, March 2016: The construction time lasted from March until November 2015. As such, the timeframe could be complied with without any limitations. The outdoor facilities are set to be completed in spring 2016. Apart from the architectural aesthetics and ergonomics, energy efficiency was at the centre of attention within the context of the new construction. The insulation has been optimised in the facade area. The windows are heat-insulated, and an air-heating pump has been installed next to the building. What is more, a ventilation system with highly efficient waste heat recovery has been implemented on the roof. With regard to the requirements to be satisfied by new buildings, the energy performance is better than prescribed by the energy efficiency regulation (EnEV).
